Miljøstyrelsen offentliggør rapporter og indlæg vedrørende forsknings- og udviklingsprojekter inden for miljøsektoren, som er finansieret af Miljøstyrelsen. Det skal bemærkes, at en sådan offentliggørelse ikke nødvendigvis betyder, at det pågældende indlæg giver udtryk for Miljøstyrelsens synspunkter. Offentliggørelsen betyder imidlertid, at Miljøstyrelsen finder, at indholdet udgør et væsentligt indlæg i debatten omkring den danske miljøpolitik.

# Forord

Denne rapport er en del af Miljøstyrelsens fortløbende arbejde med at sætte fokus på problematisk kemi i forbrugerprodukter, her med ønsket om at sætte fokus på de importerede produkter. Arbejdet til denne rapport er gennemført i perioden juni 2015 til juni 2016.

Miljøstyrelsen ønsker at takke Lone Mikkelsen og Eline Aggerholm Kristensen fra Det Økologiske Råd, som i Miljøstyrelsens arbejde med "Kemikalier i importerede forbrugerprodukter" har fungeret som konsulent for Miljøstyrelsen. Opbygningen i denne rapport er til dels inspireret af Det Økologiske Råds tilgang til arbejdet med dette emne.

# Sammenfatning og konklusion

Der er indikationer på, at en større mængde af de forbrugerprodukter, der indeholder problematiske kemiske stoffer på det danske og EU's marked er produceret i lande uden for EU snarere end inden for EU. Disse produkter kan udgøre en øget risiko for menneskers sundhed og for miljøet. Problemet med farlige stoffer i produkter importeret fra lande uden for EU kan skyldes mangler og huller i EU's kemikalielovgivning. Det kan også skyldes, at der findes ulovlige produkter på markedet eller generelle forskelle i den måde produkterne fremstilles på. Desværre kender man på nuværende tidspunkt ikke meget til problemets omfang.

I denne rapport præsenteres et første forsøg på at analysere denne problemstilling fra to forskellige vinkler. I rapportens første del gennemgås dele af den eksisterende kemikalielovgivning for forbrugerprodukter i EU, med henblik på at vurdere, om et evt. problem med problematiske kemikalier i importerede produkter måtte skyldes mangler i EU's kemikalielovgivning. Det beskrives i denne sammenhæng i hvilket omfang, reguleringen er forskellig for produkter afhængigt af, om disse produceres i EU eller importeres fra lande udenfor. I rapportens anden del gøres et første forsøg på at estimere om produkter importeret til EU indeholder mere uønsket kemi end produkter produceret i EU. Dette gøres ved at sammenligne data for notificerede produkter i "the Rapid Alert system for dangerous non-food products (RAPEX)" med importstatistikken fra Eurostat COMEXT databasen. Ønsket er at vurdere hvordan lande i EU og udenfor EU er repræsenteret i RAPEX under hensyntagen til landenes respektive andel af produktionen af produkterne på EU-markedet.

## *Regulering af kemi i forbrugerprodukter*

En gennemgang af dele af den eksisterende lovgivning for forbrugerprodukter i EU viser, at kemiske stoffer i forbrugerprodukter (artikler) er delvist reguleret i REACH. REACH stiller dog ikke krav om registrering, hvis der er tale om kemiske stoffer i artikler, som ikke er beregnet til at blive frigivet under normale eller med rimelighed forventet anvendelse af artiklen, og hvis stoffet ikke er til stede i artikler i mængder på over 1 ton pr. producent eller importør pr. år. Der vil derfor være en række forbrugerprodukter (artikler), som går fri af registreringsforpligtelsen. Dermed er producenten/importøren af artikler ikke forpligtet til at indsende dokumenteret information om de miljø- og sundhedsmæssige effekter for alle de stoffer i artikler, som de producerer eller importerer ind i EU. Dog vil stofferne i de EU-producerede/fremstillede forbrugerprodukter (artikler) allerede være registreret i EU ved dets produktion eller import. Sådanne EU-producerede forbrugerprodukter (artikler) synes derfor at udgøre en bedre beskyttelse, idet registreringen sikrer, at der er viden om stoffets identitet, klassificering og mærkning mv. Den største udfordring ses derfor ved de forbrugerprodukter, som *samles* i EU af dele, som er fremstillet uden for EU. Her vil registreringsforpligtelsen først aktiveres, hvis stoffet er beregnet til at blive frigivet under normale eller med rimelighed forventet anvendelse af artiklen, og hvis stoffet er til stede i artikler i mængder på over 1 ton pr. producent eller importør pr. år.

Hvis stoffet er på godkendelseslisten skal producenten eller importøren søge om godkendelse, inden stoffet markedsføres til en anvendelse eller selv anvender det.. REACH stiller ikke et lignende krav om godkendelse for stoffer, som produceres og anvendes uden for EU. Dermed vil de stoffer, som er på godkendelseslisten, og som skal godkendes, inden de markedsføres alene have betydning for de artikler, som er produceret i EU, og hvor de godkendte stoffer anvendes som en del af produktionen af artiklen. Hvis artiklen produceres uden for EU, er det således ikke muligt at stille krav om godkendelse af stofferne i artiklen.

Spørgsmålet er, om nogle af de produktgrupper, som er blevet identificeret, som værende områder med flest notifikationer i RAPEX, kan tilskrives den manglende registreringsforpligtelse og krav om godkendelse under REACH.

Kosmetik, legetøj og elektronik har deres egne EU-særregler, som er totalharmoniseret. I disse regelsæt sondres ikke mellem produkter, som produceres i EU eller som importeres ind i EU. Kravene er de samme, da det afgørende er, at det enkelte produkt overholder reglerne fra det øjeblik det bringes i omsætning i EU første gang. For kosmetik gælder det, at det kosmetiske produkt skal være sikkert for sundheden, når det gøres tilgængeligt på markedet.

For produktkategorier, hvor der ikke er et særskilt regelsæt fx tekstil/tøj kan REACH bilag XVII finde anvendelse i det omfang, der er begrænsninger, fx krom VI i lædervarer, nikkel, cadmium og DMF.

Hvis et stof i disse produktkategorier ikke er begrænset i REACH bilag XVII, og det vurderes at udgøre en risiko for menneskers sundhed, finder produksikkerhedsloven anvendelse. Med den er det muligt at få konkrete farlige produkter væk fra markedet, men den giver også mulighed for at påbegynde en proces, hvormed Kommissionen med hjemmel i produksikkerhedsdirektivet artikel 13, kan vedtage en Kommissionsbeslutning, som kan stille krav til medlemsstaterne om at sørge for, at produkter indeholdende et bestemt stof ikke bringes i omsætning eller gøres tilgængeligt på unionens marked, hvis det udgør en alvorlig risiko for forbrugernes sundhed. Dette er fx sket for stoffet dimethylfumarat (DMF) i varer. Formålet med denne bestemmelse i direktivet er at muliggøre en hurtig reaktion, hvor det er nødvendigt. Efterfølgende er det hensigten, at der skal udarbejdes et selvstændigt EU-regelsæt eller en ny begrænsning under REACH bilag XVII. DMF er i dag reguleret i REACH bilag XVII, nr. 61, som forbyder brugen af DMF i en større koncentration end 0,1 mg/kg i artikler eller dele heraf samt at disse bringes i omsætning i EU.

Som nævnt ovenfor kan forbrugerprodukter (artikler), som indeholder kemiske stoffer, der ikke er beregnet til at blive frigivet under normale eller med rimelighed forventet anvendelse af artiklen, og hvor stoffet ikke er til stede i artiklen i mængder på over 1 ton pr. producent eller importør pr. år., vil derfor gå fri af registreringsforpligtelsen. Disse forbrugerprodukter må dog ikke udgøre en risiko for forbrugeren ved almindelig og forudsigelig anvendelse, jf. produksikkerhedsloven, og myndighederne kan derfor forbyde et produkt efter en konkret vurdering, hvis det vurderes, at produktet udgør en sundhedsrisiko.

Produksikkerhedsdirektivet, som er implementeret i produksikkerhedsloven, varetager kun sundhedshensyn. Forbrugerprodukter, som måtte udgøre en miljørisiko, og som ikke falder ind under REACH-registreringsforpligtelsen for stoffer i artikler eller under en begrænsning i bilag XVII, jf. ovenfor, falder altså ikke ind under produksikkerhedsdirektivets anvendelsesområde. Der er derfor en risiko for, at ikke alle sådanne produkter er reguleret i EU.

#### *Analyse af data fra RAPEX og Eurostat COMEXT*

I denne del af rapporten gøres et første forsøg på at vurdere om produkter importeret til EU indeholder mere uønsket kemi end produkter produceret i EU.

Gennem det europæiske notificeringssystem RAPEX kan medlemslandene dele oplysninger med hinanden og kommissionen om farlige produkter og produkter, der udgør en risiko. I dette projekt fokuseres der på notifikationer i de tre produktkategorier "Legetøj", "Kosmetik" og "Tøj, Tekstil og Modeprodukter", som er indberettet i systemet på grund af produktets kemiske indhold. Andelen af notificerede produkter produceret udenfor EU skal vurderes under hensyntagen til disse landes andel af EU-markedet for den givne produktkategori. Dette gøres ved at sammenligne oplysningerne i RAPEX med data fra Eurostat COMEXT statistik.

Der er mange forbehold forbundet med brugen af disse data til dette projekts formål, hvilket gør det svært på baggrund heraf at konkludere præcist, hvorvidt der er forskel mellem produkter produceret i EU og udenfor EU i forhold til indholdet af problematisk kemi. Men analysen i denne rapport kan bruges til at beskrive trends.

En gennemgående trend er, at størstedelen af de RAPEX-notificerede produkter er produceret udenfor EU. For produktkategorierne "Legetøj", "Kosmetik" og "Tøj, Tekstil og Modeprodukter" er henholdsvis 95 %, 72 % og 84 % af de notificerede produkter i 2013-2014 produceret i lande udenfor EU.

I sammenligningen af oplysninger i RAPEX med Eurostat COMEXTs importstatistik vælges det at fokusere på de tyske indberetninger i RAPEX og importen fra henholdsvis andre EU lande og lande udenfor EU til Tyskland. Tyskland er valgt som modelland, da det ikke var muligt at lave analysen for hele EU på grund af manglende oplysninger i Eurostat COMEXTs statistik, og fordi det ikke var muligt at fokusere på Danmark på grund af dets få indberetninger i RAPEX.

Tysklands importstatistik for produktkategorierne 'Legetøj' og 'Tøj, Tekstil, og Modeprodukter' viser at størstedelen af de importerede produkter kommer fra lande udenfor EU (henholdsvis 59 % og 68 %), hvorimod størstedelen af kosmetiske produkter importeres fra andre EU lande (81 %).

Sammenligningen med oplysningerne i RAPEX viser at de notificerede produkter i produktkategorierne 'Legetøj' og 'Tøj, Tekstil, og Modeprodukter' primært kommer fra lande med stor eksport til Tyskland (primært Kina). Hvorimod de notificerede produkter i produktkategorien "Kosmetik" primært importeres fra lande med en relativ lille eksport til Tyskland, fx USA, Elfenbenskysten, Kina, Den Demo. Rep. Congo og Pakistan. Tendensen for de kosmetiske produkter kan formentlig forklares ved, at der for de notificerede produkter er tale om nicheprodukter, fx blegecreme, som importeres enten af private eller af små importører, der ikke lever op til kemikalielovgivningen i EU.

I den forbindelse kan det diskuteres om registreringsgrænsen på 1 ton pr år pr producent eller importør er sufficient til beskyttelse af forbrugerne, da forbrugerprodukter også kommer til EU via små importører.

Trenden viste at landene udenfor EU er overrepræsenteret blandt de tyske indberetninger i RAPEX, også under hensyntagen til landenes respektive andel af importen til Tyskland. Trenden viste desuden at dette var uafhængigt af om produktionen af de importerede produkter primært ligger udenfor EU (Legetøj og Tøj, Tekstil og Modeprodukter) eller indenfor EU (Kosmetik). Således udgjorde landene udenfor EU samlet 59 %, 19 % og 68 % af importen af henholdsvis "Legetøj", "Kosmetik" og "Tøj, Tekstil og Modeprodukter" til Tyskland i 2005-2014, mens deres andel af de notificerede produkter i RAPEX var 79 %, 80 % og 81 % for "Legetøj", "Kosmetik" og "Tøj, Tekstil og Modeprodukter" i samme periode.

Disse trends skal dog vurderes i forhold til den generelle usikkerhed om, hvordan de notificerede produkter i RAPEX er identificeret, da antallet og typen af notificerede produkter vil afhænge af, hvilke indberetninger der modtages og hvilke kontrolindsatser myndighederne foretager i de forskellige medlemslande

De skal ligeledes vurderes i forhold til forbehold forbundet med brug af Eurostat COMEXTs statistik. Fx kan det give usikkerheder i validiteten af importstatistikken at produkter fra ikke-europæiske lande i høj grad indskibes i EU via de store havne, da denne baseres på afsendelsesland og ikke oprindelsesland. Hvis en stor del af de varer, der registreres som værende importeret til Tyskland fra fx Nederlandene i virkeligheden er produceret udenfor EU, vil den

observerede trend svækkes, og landene udenfor EU vil være mindre overrepræsenteret i RAPEX, da importen fra disse lande da vil udgøre en større andel end estimeret i denne rap-ports analyse. Omvendt ville kendskabet til en given produktion i Tyskland forstærke den ob-serverede trend, der viser at ikke-EU lande er overrepræsenteret i RAPEX i forhold til deres andel af EU markedet for de enkelte produktkategorier.

# Summary and conclusion

There are indications that a large amount of consumer products containing chemical substances of concern on the Danish and EU markets have been manufactured in countries outside the European Union rather than inside the European Union. These products may present a risk to human health and the environment. The problem with hazardous substances in products imported from countries outside the EU may be due to deficiencies and gaps in the EU legislation on chemicals. It may also be due to illegal products on the market or general differences in the way the products are made. Unfortunately there is currently not much information available about the scope of this problem.

This report presents a first attempt to analyse the problem from two different angles. The first part of the report presents parts of existing chemicals legislation for consumer products in the EU with a view to assessing whether a possible problem with chemicals of concern in imported products is due to deficiencies in the EU legislation on chemicals. In this connection, the report describes the extent to which regulation differs for products, depending on whether these are manufactured in the EU or are imported from countries outside the EU. The second part of the report is an initial attempt to estimate whether products imported to the EU contain more undesirable chemicals than products made in the EU. The estimate is carried out by comparing data on products notified in the Rapid Alert System for dangerous non-food products (RAPEX) with import statistics from the Eurostat COMEXT database. The aim of the estimate is to assess how countries inside and outside the EU are represented in RAPEX, taking into account the percentages the products on the EU market manufactured in the respective countries.

## *Regulation of chemicals in consumer products*

A review of parts of the existing legislation on consumer products in the EU shows that chemical substances in consumer products (articles) are partly regulated by the regulations in REACH. However, REACH does not require registration for chemical substances in articles that are not intended to be released under normal or with reasonably foreseeable conditions of use of the article, and if the substance is not present in articles in quantities totalling over one tonne per producer or importer per year. Consequently, a number of consumer products (articles) will be exempt from the registration obligation. This means that the producer/importer of articles is not obliged to submit documented information on the environmental and human health impacts for all the substances in articles that they produce or import into the EU. However, substances in consumer products (articles) produced or manufactured in the EU will already have been registered in the EU in connection with production or import of the substance. Such EU-produced consumer products (articles) therefore seem to provide better protection, as registration ensures knowledge about the identity, classification, labelling etc. of the substances in the products. The biggest challenge is therefore in the consumer products that are *assembled* in the EU from components produced outside the EU. The registration obligation will only be activated if the substance is intended to be released under normal or with reasonably foreseeable conditions of use of the article, and if the substance is not present in articles in quantities totalling over one tonne per producer or importer per year.

If the substance is on the Authorisation List, the producer or importer must apply for authorisation before the substance is placed on the market for use or the producer or importer uses the substance for its own account. REACH does not impose comparable requirements for authorisation of substances produced and used outside the EU. Thus, substances on the Authorisation List and substances to be authorised before being placed on the market will only affect articles produced in the EU and where the authorised substances are used as part of the pro-

duction of the article. If an article is produced outside the EU, it is therefore not possible to impose requirements for authorisation of substances in the article.

The question is whether some of the product categories identified as areas with most notifications in RAPEX can be attributed to the lack of registration obligation and requirements for authorisation under REACH.

Cosmetics, toys and electronic devices have their own special EU rules, and these have been fully harmonised. These rules do not differ between products manufactured in the EU or products imported into the EU. The requirements are the same, as it is crucial that the individual product complies with the rules from the moment it is first placed on the market in the EU. Cosmetic products must be safe for human health when they are made available on the market.

For product categories which do not have a separate set of rules, e.g. textiles/clothing, Annex XVII to REACH may apply to the extent that there are restrictions, e.g. chromium VI in leather goods, nickel, cadmium and DMF.

If a substance in any of these product categories is not restricted in Annex XVII to REACH, and the substance is assessed to pose a risk to human health, the Product Safety Act will apply. The Product Safety Act makes it possible to remove specific dangerous products from the market. It also allows the European Commission to initiate a process by which, on the basis of Article 13 of the General Products Safety Directive, the Commission can adopt a Commission Decision to require Member States to prevent products containing a specific substance from being placed or made available on the EU market if it poses a serious risk to the health of consumers. This has happened for the substance dimethylfumarate (DMF). The objective of this provision in the Directive is to allow rapid response where necessary. The aim is then to prepare a separate set of EU rules or a new restriction under Annex XVII to REACH. DMF is currently regulated in no. 61 in Annex XVII to REACH, which prohibits the use of DMF in concentrations greater than 0.1 mg/kg. in articles or any parts thereof, and that these are not placed on the market in the EU.

As mentioned above, consumer products (articles) containing chemical substances that are not intended to be released under normal conditions or with reasonably foreseeable conditions of use of the article, and where the substance is not present in articles in quantities over one tonne per producer or importer per year may therefore be exempt from the registration obligation. However, these consumer products may not pose a risk to consumers in general and foreseeable use, see the Product Safety Act. Therefore, authorities may ban a product following a specific assessment if the product is considered to pose a risk to human health.

The General Products Safety Directive, which has been implemented in the Product Safety Act, only deals with health considerations. Consumer products which may present an environmental risk, and which are not subject to the REACH registration obligation for substances and articles or subject to the restrictions in Annex XVII, see above, therefore do not fall within the scope of the General Products Safety Directive. Thus, there is a risk that not all such products are regulated in the EU.

#### *Data analysis from RAPEX and Eurostat COMEXT*

This part of the report is an initial attempt to assess whether products imported to the EU contain more chemicals of concern than products made in the EU.

Through the European notification system, RAPEX, Member States can share information with each other and the European Commission on hazardous substances and products presenting risks. This project uses information on RAPEX notifications in the three product categories "Toys", "Cosmetics" and "Clothing, Textiles and Fashion items", all of which have been reported

to the system due to their chemical contents. The share of notified products made outside the EU is assessed, taking into account these countries' share of the EU market for the given product category. This is done by comparing information in RAPEX with data from the Eurostat COMEXT statistics.

There are many reservations associated with the use of this data for the objectives of this project, and this makes it difficult to conclude whether there is a real difference between products made in the EU and products made outside the EU in relation to the content of chemicals of concern. However, the analysis in this report can be used to describe trends.

A general trend is that the majority of RAPEX-notified products are manufactured outside the EU. For "Toys", "Cosmetics" and "Clothing, Textiles and Fashion items", 95%, 72% and 84%, respectively, of the notified products in 2013-2014 were manufactured in countries outside the EU.

In the comparison of information in RAPEX with import statistics from Eurostat COMEXT, the focus in this report is on the German notifications in RAPEX and on imports to Germany from other EU Member States and countries outside the EU. Germany was chosen as a model country, as it was not possible to make an analysis for the entire EU due to lack of information in the statistics from Eurostat COMEXT, and because it was not possible to focus on Denmark due to its few notifications in RAPEX.

German import statistics show that for "Toys" and "Clothing, Textiles and Fashion items" the majority of imported products come from countries outside the EU (59% and 68%, respectively), whereas the majority of "Cosmetics" are imported from other EU Member States (81%).

The comparison of German import statistics and information in RAPEX shows that the notified products in "Toys" and "Clothing, Textiles and Fashion items" primarily comes from countries with high exports to Germany (primarily China). In contrast, the notified products in "Cosmetics" are primarily imported from countries with relatively low exports to Germany, e.g. the US, the Ivory Coast, China, the Democratic Republic of Congo and Pakistan. The trend for cosmetic products can probably be explained by the fact that the notified products are niche products, e.g. bleaching cream, which are either imported by private individuals or by small importers who are not in compliance with the EU legislation on chemicals.

In this connection, it could be discussed whether the registration limit of 1 tonne per year per producer or importer is sufficient to protect consumers, as consumer products also come to the EU through small importers.

Taking into account the countries' respective share of imports to Germany, the trend showed an overrepresentation of countries outside the EU among German notifications in RAPEX. Moreover, the trend showed that this was regardless of whether the production of the imported products is primarily outside the EU (Toys and Clothing, Textiles and Fashion products) or inside the EU (Cosmetics). Countries outside the EU therefore accounted for 59%, 19% and 68% respectively of imports of "Toys", "Cosmetics" and "Clothing, Textiles and Fashion items" to Germany in 2005-2014, whereas the respective share of notified products in RAPEX was 79%, 80% and 81% in the same period.

However, these trends should be assessed in relation to the general uncertainty as to how the notified products in RAPEX have been identified, because the number and type of notified products will depend on the type of notifications received and the type of control procedures the authorities carry out in the different Member States.

Similarly, they should be assessed in relation to reservations associated with the use of statistics from Eurostat COMEXT. For instance, the fact that products from non-EU countries are largely shipped into the EU via the large ports may cause uncertainty regarding the validity of the import statistics, as this is based on the country of dispatch and not the country of origin. If a large percentage of the goods that are registered as being imported to Germany from e.g. the Netherlands are originally manufactured outside the EU, the observed trend will be weakened, and countries outside the EU will be less overrepresented in RAPEX, as imports from these countries will then constitute a larger share than estimated in the analysis of this report. On the other hand, awareness of a given production in Germany, which was not included in this report due to lack of data, will reinforce the observed trend that shows that non-EU countries are overrepresented in RAPEX in relation to their share of the EU market for the individual product categories.

# 1. Introduktion

Der er indikationer på, at en større mængde af de forbrugerprodukter, der indeholder problematiske kemiske stoffer på det danske og EU's marked er produceret i lande uden for EU snarere end inden for EU. Disse produkter kan udgøre en øget risiko for menneskers sundhed og for miljøet. Problemet med farlige stoffer i produkter importeret fra lande uden for EU kan skyldes mangler og huller i EU's kemikalielovgivning. Det kan også skyldes, at der findes ulovlige produkter på markedet eller generelle forskelle i den måde produkterne fremstilles på. Desværre kender man på nuværende tidspunkt ikke meget til problemets omfang.

Både den danske regering og EU har sat fokus på problematikken omkring forbrugerprodukter, der er importeret fra lande uden for EU, og som indeholder ulovlige kemikalier og farlige kemikalier, der kan udgøre en risiko.

Denne rapport præsenterer et første forsøg på at analysere problemet og vil bidrage til den danske Miljøstyrelses fremtidige indsats på området. I rapportens første del gennemgås dele af den eksisterende lovgivning for forbrugerprodukter i EU. Det beskrives i denne sammenhæng i hvilket omfang, reguleringen er forskellig for produkter afhængigt af, om disse produceres i EU eller importeres fra lande udenfor. Det sker med henblik på at vurdere, om et evt. problem med problematiske kemikalier i importerede produkter måtte skyldes mangler i EU's kemikalielovgivning. I rapportens anden del bliver problemstillingen belyst på baggrund af tilgængelige data ved at sammenholde notificerede produkter i RAPEX med information om importen af produkter til EU.

## 2. Regulering af kemi i forbrugerprodukter

Kemiske stoffer i forbrugerprodukter er reguleret i en lang række forskellige EU-regelsæt. I det følgende foretages en overordnet gennemgang af nogle af de forskellige regelsæt, herunder også de særskilte regler for produkttyperne kosmetik, legetøj og elektronik. Det sker med henblik på at vurdere, om der er områder, hvor stoffer i forbrugerprodukter kan udgøre en risiko for sundhed og miljø, som ikke bliver dækket af den gældende regulering.

### 2.1 REACH-forordningen

REACH<sup>1</sup> er EU's generelle kemikaliregulering. REACH regulerer fremstilling, markedsføring og anvendelse af stoffer som sådan, i blandinger eller i artikler. Derudover regulerer REACH markedsføring af blandinger og artikler, der indeholder visse stoffer. Markedsføring er i REACH defineret til også at omfatte import. Ved en artikel forstås en genstand, der under fremstilling har fået en særlig form, overflade eller design, der i højere grad end den kemiske sammensætning er bestemmende for dens funktion. Forbrugerprodukter vil i denne sammenhæng kunne være såvel artikler som (stoffer og) blandinger.

#### *Registrering af stoffer*

REACH stiller krav om, at stoffer som sådan, i blandinger eller i artikler kun må fremstilles eller markedsføres i EU i mængder over 1 ton pr. år pr. producent/importør, hvis de er registreret i overensstemmelse med kravene i forordningen. REACH stiller i den forbindelse krav til, hvilke oplysninger producenten/importøren er forpligtet til at indsende i forbindelse med registreringen, herunder information om de miljø- og sundhedsmæssige effekter af de stoffer, som de producerer og importerer. Det er det Europæiske Kemikalieagentur, der modtager registreringerne.

#### *Registrering af stoffer i artikler*

Når det kommer til stoffer i artikler, gælder der særlige betingelser, før en registrering er påkrævet: Da stoffet udover at være til stede i artiklerne i mængder på over 1 ton pr. producent eller importør pr. år, også skal være beregnet til at blive frigivet under normal eller med rimelighed forventet anvendelse af artiklen (fx bleer med lotion). Det er derfor langt fra alle stoffer i artikler, som skal registreres.

Dette gælder uanset, om den færdige artikel er importeret direkte fra et land uden for EU, eller om artiklen bliver produceret i EU. Dog vil de artikler, som *fremstilles* i EU ofte indeholde stoffer, som allerede er registreret. I de tilfælde, hvor artiklen *samlles* i EU af dele/komponenter, som er blevet importeret fra lande uden for EU, vil kravene om den særlige registreringsforpligtelse for stoffer i artikler betyde, at disse importerede dele indeholder stoffer, hvis miljø- og sundhedseffekter først bliver kendte via en registreringsforpligtelse, når de er beregnet til at blive frigivet og i øvrigt er til stede i artikler i mængder over 1 ton pr. producent eller importør pr. år.

#### *Anmeldelse ved kandidatlistestoffer i artikler*

For stoffer i artikler gælder det endvidere, at der skal gives anmeldelse til agenturet, hvis artiklen indeholder kandidatlistestoffer, og disse er til stede i artiklerne i mængder på over 1 ton pr.

<sup>1</sup> Europa-Parlamentets og Rådets forordning (EF) nr. 1907/2006 af 18. december 2006 om registrering, vurdering og godkendelse af samt begrænsninger for kemikalier (REACH), om oprettelse af et europæisk kemikalieagentur og om ændring af direktiv 1999/45/EF og ophævelse af Rådets forordning (EØF) nr. 793/93 og Kommissionens forordning (EF) nr. 1488/94 samt Rådets direktiv 76/769/EØF og Kommissionens direktiv 91/155/EØF, 93/67/EØF, 93/105/EF og 2000/21/EF.

producent eller importør pr. år, og hvis de er til stede i disse artikler i en koncentration på over 0,1 vægtprocent (kandidatlistestoffer er stoffer, der er særligt problematiske i forhold til miljø og sundhed). Anmeldelsen omfatter en række oplysninger om stoffets identitet, klassificering, mængdeinterval, beskrivelse af anvendelsen af stoffet, kontaktoplysninger på producent/importør mv. Denne anmeldelse giver således agenturet viden om, i hvor høj grad disse kandidatlistestoffer anvendes i forskellige sammenhænge og kan danne grundlag for fremtidige begrænsninger under REACH bilag XVII, mere herom nedenfor. Herudover medfører et indhold af kandidatlistestoffer i artikler i en koncentration på over 0,1 vægtprocent en forpligtelse for enhver leverandør af artiklen til at videregive visse oplysninger om stofferne, herunder som minimum stoffets navn, til modtageren af artiklen og, efter anmodning, til en forbruger.

#### *Godkendelse af visse stoffer*

REACH stiller krav om at producenter eller importører i EU ikke uden videre må markedsføre et stof til en anvendelse eller selv anvende det, hvis stoffet er optaget på bilag XIV (godkendelseslisten) i REACH. Hvis stoffet er på godkendelseslisten, skal producenten eller importøren søge om godkendelse, inden man markedsfører stoffet til en anvendelse eller selv anvender det. REACH stiller ikke et lignende krav om godkendelse for stoffer, som produceres og anvendes uden for EU. Det er Kommissionen, der træffer afgørelse om godkendelse, og de tager hensyn til samtlige udledninger, emissioner og udslip, herunder risici i forbindelse med diffuse eller udbredte anvendelser, der er kendte på tidspunktet for afgørelsen.

#### *Begrænsninger*

Herudover indeholder REACH muligheden for at fastsætte produktspecifikke begrænsninger for et stof i bilag XVII. Et stof som sådan, i en blanding eller i en artikel, for hvilket bilag XVII indeholder en begrænsning, må ikke fremstilles, markedsføres eller anvendes i EU, medmindre det opfylder betingelserne i den pågældende begrænsning. En artikel kan derfor ikke lovligt markedsføres i EU, hvis den indeholder stoffer i strid med en begrænsning i bilag XVII. Der er en række begrænsninger i bilag XVII. Fx er det ikke tilladt at anvende bly i en koncentration over 0,05 vægtprocent i smykker (i de homogene enkeltdele) eller at markedsføre sådanne smykker. Andre eksempler på begrænsninger er bl.a. ftalater i legetøj og småbørnsartikler, krom VI i lædervarer, der kommer i kontakt med huden, azofarvestoffer i tekstil- og lædervarer, som kan komme i berøring med huden i længere tid, dimethylfumarat (DMF) i artikler eller dele heraf, samt nikkel i artikler, der kommer i direkte og langvarig berøring med huden. En begrænsning i REACH bilag XVII som forbyder markedsføring af en artikel gælder uanset om produktet bliver importeret ind i EU fra et land uden for EU, eller om det produceres i EU.

## **2.2 Kosmetikforordningen**

Kosmetikforordningen<sup>2</sup> er totalharmoniserende og gælder for alle kosmetiske produkter, som gøres tilgængelige i EU.

Et kosmetisk produkt, der gøres tilgængeligt på markedet, skal være sikkert for menneskers sundhed, når det anvendes under normale betingelser eller under betingelser, som med rimelighed kan forudses.

Der skal være udpeget en ansvarlig person inden for fællesskabet, før et kosmetisk produkt bringes i omsætning i fællesskabet. Den ansvarlige person sikrer, at ethvert kosmetisk produkt, som bringes i omsætning, overholder forordningens krav. Den ansvarlige person kan være producenten, importøren eller distributøren afhængig af omstændighederne.

---

<sup>2</sup> Europa-Parlamentets og Rådets forordning (EF) nr. 1223/2009 af 30. november 2009 om kosmetiske produkter.

Det er ligegyldigt, om det kosmetiske produkt er produceret i EU eller om det importeres ind i EU, da kravene i forordningen omfatter alle kosmetiske produkter, når de gøres tilgængelige på EU-markedet.

### 2.3 Legetøjsdirektivet

Legetøjsdirektivet<sup>3</sup> er implementeret i dansk ret i bekendtgørelse om sikkerhedskrav til legetøjsprodukter (legetøjsbekendtgørelsen).

Denne EU-særregulering er totalharmoniserende og indebærer, at legetøj til børn under 14 år ikke må bringes i omsætning i EU, hvis det udgør en fare for sikkerheden og sundheden for brugeren eller andre, når det anvendes til det beregnede formål eller på en måde, som børn må forventes at anvende det.

Der er en formodning for, at legetøj er sikkert, hvis det er konstrueret og fremstillet i overensstemmelse med harmoniserede standarder, eller i overensstemmelse med en prototype, der er typegodkendt af et organ, der er godkendt dertil. Dog er den alt overvejende hovedregel, at legetøjet ikke må udgøre en risiko for brugeren. Det gælder altså uanset, om det måtte være konstrueret og fremstillet i overensstemmelse med en harmoniseret standard eller typegodkendt prototype.

Herudover stiller legetøjsdirektivet krav om at legetøj skal være CE-mærket, så det er synligt for myndighederne og andre, at produktet er i overensstemmelse med de sikkerheds- og sundhedsmæssige krav i legetøjsdirektivet. Den ansvarlige for CE-mærkningen er den, der bringer legetøjet i omsætning. Med CE-mærkningen står den ansvarlige inde for, at legetøjet er konstrueret og fremstillet i overensstemmelse med harmoniserede standarder eller er typegodkendt.

Legetøj, som produceres (eller samles) i EU, eller som importeres ind i EU, skal overholde legetøjsdirektivet, så snart det bringes i omsætning.

### 2.4 RoHS-direktivet

RoHS-direktivet<sup>4</sup> er implementeret i danske ret i bekendtgørelse om begrænsning af import og salg samt fremstilling til eksport inden for EU af elektrisk og elektronisk udstyr, som indeholder visse farlige stoffer.

Denne EU-særregulering er totalharmoniserende og indebærer, at elektronik ikke må indeholde visse farlige stoffer i en mængde over den for stoffet tilladte grænseværdi.

Dette regelsæt pålægger producenten og importøren at sikre, at deres elektroniske produkt overholder RoHS-reglerne, inden det bringes i omsætning i EU. Producenten er ansvarlig for at påsætte CE-mærkning på slutproduktet, og skal dermed kunne dokumentere, at produktet ikke indeholder nogle af de farlige stoffer over grænseværdien.

Alle elektroniske produkter, som bringes i omsætning i EU - hvad enten de er produceret i EU eller importeret ind i EU - skal have CE-mærkning og dermed overholde grænseværdierne.

<sup>4</sup> Europa-Parlamentets og Rådets direktiv 2011/65/EF af 8. juni 2011 om begrænsning af anvendelsen af visse farlige stoffer i elektrisk og elektronisk udstyr.

## 2.5 Produktsikkerhedsdirektivet

Produktsikkerhedsdirektivet<sup>5</sup> er implementeret i dansk ret i produktsikkerhedsloven. Den finder anvendelse både som udfyldningslov, dvs. på områder, hvor der ikke allerede er regulering, og som tillægslov for en evt. særregulering.

Produktsikkerhedsloven finder anvendelse på forbrugerprodukter og stiller krav om, at producenter, herunder importører, kun må bringe sikre produkter i omsætning.

Produkter som produceres i EU eller som importeres ind i EU fra et tredje land skal være sikre at anvende for forbrugere. Et sikkert produkt er ifølge produktsikkerhedsloven et produkt, hvor der ikke opstår en risiko for sikkerheds- eller sundhedsmæssig fare for forbrugere, når produktet anvendes under almindelige eller forudsigelige omstændigheder og inden for produktets forventede levetid.

Et produkt *betragtes* som sikkert, når det er konstrueret og fremstillet i overensstemmelse med de sikkerheds- og sundhedsmæssige krav, der er fastsat i lovgivningen. Herudover er der en *formodning for*, at produktet er sikkert, når det er konstrueret og fremstillet i overensstemmelse med sikkerheds- og sundhedsmæssige krav, der er fastsat i nationale standarder, som gennemfører europæiske standarder. Hvis der ikke er fastsat sikkerheds- eller sundhedsmæssige krav i lovgivningen eller i standarder, vurderes produktets sikkerhed ud fra en konkret risikovurdering.

Produktsikkerhedsloven omfatter kun sikkerheds- og sundhedsmæssig fare forbundet med et forbrugerprodukt, hvorfor miljøfare ikke vil være omfattet af loven. Et forbrugerprodukt som måtte udgøre en fare for miljøet falder altså uden for denne lovs anvendelsesområde.

Udover de ovennævnte regelsæt kan nævnes følgende andre EU-regelsæt, som også har betydning for forbrugerprodukter i EU: POP-forordningen om persistente organiske miljøgifte, forordning om vaske- og rengøringsmidler, biocidforordningen, som både har betydning for biocidmidler og biocidbehandlede artikler samt pesticidforordningen. Disse regelsæt vil dog ikke blive berørt yderligere i det følgende.

## 2.6 Konklusion: Regulering af kemi i forbrugerprodukter

Kemiske stoffer i forbrugerprodukter (artikler) er delvist reguleret i REACH. REACH stiller dog ikke krav om registrering, hvis der er tale om kemiske stoffer i artikler, som ikke er beregnet til at blive frigivet under normale eller med rimelighed forventet anvendelse af artiklen (jf. eksemplet med bleer med lotion), og hvis stoffet ikke er til stede i artikler i mængder på over 1 ton pr. producent eller importør pr. år. Der vil derfor være en række forbrugerprodukter (artikler), som går fri af registreringsforpligtelsen. Dermed er producenten/importøren af artikler ikke forpligtet til at indsende dokumenteret information om de miljø- og sundhedsmæssige effekter for alle de stoffer i artikler, som de producerer eller importerer ind i EU. Dog vil stofferne i de EU-producerede/fremstillede forbrugerprodukter (artikler) allerede være registreret i EU ved dets produktion eller import. Sådanne EU-producerede forbrugerprodukter (artikler) synes derfor at udgøre en bedre beskyttelse, idet registreringen sikrer, at der er viden om stoffets identitet, klassificering og mærkning mv. Den største udfordring ses derfor ved de forbrugerprodukter, som *samles* i EU af dele, som er fremstillet uden for EU. Her vil registreringsforpligtelsen først aktiveres, hvis stoffet er beregnet til at blive frigivet under normale eller med rimelighed forventet anvendelse af artiklen (jf. eksemplet med bleer med lotion), og hvis stoffet er til stede i artikler i mængder på over 1 ton pr. producent eller importør pr. år.

---

<sup>5</sup> Europa-Parlamentets og Rådets direktiv 2001/95/EF af 3. december 2001 om produktsikkerhed i almindelighed.

Som nævnt skal producenten eller importøren søge om godkendelse, inden man markedsfører stoffet til en anvendelse eller selv anvender det, hvis stoffet er på godkendelseslisten. REACH stiller ikke et lignende krav om godkendelse for stoffer, som produceres og anvendes uden for EU. Dermed vil de stoffer, som er på godkendelseslisten, og som skal godkendes, inden de markedsføres alene have betydning for de artikler, som er produceret i EU og hvor de godkendte stoffer anvendes som en del af produktionen af artiklen. Hvis artiklen produceres uden for EU, er det således ikke muligt at stille krav om godkendelse af stofferne i artiklen.

Spørgsmålet er, om nogle af de produktgrupper, som er blevet identificeret, som værende områder med flest notifikationer i RAPEX, kan tilskrives den manglende registreringsforpligtelse og krav om godkendelse under REACH.

Som gennemgået ovenfor har både kosmetik, legetøj og elektronik deres egne EU-særregler, som er totalharmoniseret. I disse regelsæt sondres ikke mellem produkter, som produceres i EU eller som importeres ind i EU. Kravene er de samme, da det afgørende er, at det enkelte produkt overholder reglerne fra det øjeblik det bringes i omsætning i EU første gang. For kosmetik gælder det, at det kosmetiske produkt skal være sikkert for sundheden, når det gøres tilgængeligt på markedet.

Der er ikke et særskilt regelsæt for tekstil/tøj, men REACH bilag XVII finder anvendelse i det omfang, der er begrænsninger, fx krom VI i lædervarer, nikkel, cadmium og DMF.

Hvis et stof i tekstil/tøj ikke er begrænset i REACH bilag XVII, og det vurderes at udgøre en risiko for menneskers sundhed, finder produktsikkerhedsloven anvendelse. Med den er det muligt at få konkrete farlige produkter væk fra markedet, men den giver også mulighed for at påbegynde en proces, hvormed Kommissionen med hjemmel i produktsikkerhedsdirektivets artikel 13, kan vedtage en Kommissionsbeslutning, som kan stille krav til medlemsstaterne om at sørge for, at produkter indeholdende et bestemt stof ikke bringes i omsætning eller gøres tilgængeligt på unionens marked, hvis det udgør en alvorlig risiko for forbrugernes sundhed. Dette er fx sket for stoffet dimethylfumarat (DMF) i varer. Formålet med denne bestemmelse i direktivet er at muliggøre en hurtig reaktion, hvor det er nødvendigt. Efterfølgende er det hensigten, at der skal udarbejdes et selvstændigt EU-regelsæt eller en ny begrænsning under REACH bilag XVII. DMF er i dag reguleret i REACH bilag XVII, nr. 61, som forbyder brugen af DMF i en større koncentration end 0,1 mg/kg i artikler eller dele heraf samt at disse bringes i omsætning i EU.

Forbrugerprodukter (artikler), som indeholder kemiske stoffer, der ikke er beregnet til at blive frigivet under normale eller med rimelighed forventet anvendelse af artiklen, og hvor stoffet ikke er til stede i artiklen i mængder på over 1 ton pr. producent eller importør pr. år., vil derfor gå fri af registreringsforpligtelsen. Disse forbrugerprodukter må dog ikke udgøre en risiko for forbrugeren ved almindelig og forudsigelig anvendelse, jf. produktsikkerhedsloven, og myndighederne kan derfor forbyde et produkt efter en konkret vurdering, hvis det vurderes, at produktet udgør en sundhedsrisiko.

Produktsikkerhedsloven varetager kun sundhedshensyn. Forbrugerprodukter, som måtte udgøre en miljørisiko, og som ikke falder ind under REACH-registreringsforpligtelsen for stoffer i artikler eller under en begrænsning i bilag XVII, jf. ovenfor, falder altså ikke ind under produktsikkerhedsdirektivets anvendelsesområde. Der er derfor en risiko for, at ikke alle sådanne produkter er reguleret i EU.

# 3. Analyse af data fra RAPEX og Eurostat COMEXT

Formålet med analysen er at vurdere, om produkter importeret til EU fra lande udenfor EU indeholder mere uønsket kemi end produkter produceret i EU. Dette undersøges ved at sammenligne data for notificerede produkter i "the Rapid Alert system for dangerous non-food products (RAPEX)" med import-statistikken fra Eurostat COMEXT databasen. Ønsket er at vurdere hvordan lande i EU og udenfor EU er repræsenteret i RAPEX under hensyntagen til landenes respektive andel af produktionen af produkterne på EU-markedet.

## *RAPEX systemet*

Det europæiske notificeringssystem RAPEX er lovmæssigt funderet i produktsikkerhedsdirektivet (2001/95/EC)<sup>6</sup> og markedsovervågningsforordningen (765/2008) og administreres af den Europæiske Kommission. Systemet, som blev udviklet af EU i 2005, gør det muligt for medlemsstaterne at videregive oplysninger til Kommissionen om farlige produkter og produkter, der udgør en alvorlig risiko. Disse oplysninger vil herigennem blive delt med de øvrige medlemsstater, hvilket sætter dem i stand til at udsende nationale advarsler.

Alle medlemsstater har pligt til at notificere et produkt, når følgende er opfyldt:

1. Produktet bruges enten af forbrugere eller professionelle.
2. Produktet er omfattet af foranstaltninger, der kan forhindre, begrænse eller indføre særlige bestemmelser for dets eventuelle markedsføring eller brug (præventive og restriktive foranstaltninger).
3. Produktet udgør en alvorlig sundheds- eller sikkerhedsrisiko for brugeren, eller udgør en risiko for miljøet.
4. Produktet kan udgøre samme risiko i andre europæiske lande.

Notifikationen skal indeholde nok information til, at andre medlemsstater kan identificere produktet og dets leverandør, samt spore dets oprindelse og bestemme dets relative risiko.

## *Eurostats COMEXT database*

Eurostat er kommissionens generaldirektorat over statistiske oplysninger. Dens vigtigste ansvarsområder er at tilvejebringe statistiske oplysninger til de forskellige institutioner i EU og fremme harmoniseringen af statistiske metoder på tværs af medlemslandene. Eurostats statistiske databaser er tilgængelige via internettet, inkl. COMEXT databasen<sup>7</sup>, der er en database over handel med varer.

### 3.1 Forbehold ved brug af data fra RAPEX og Eurostat COMEXT

Der er en del forbehold og antagelser forbundet med brug af data fra RAPEX og Eurostat COMEXT til den i denne rapport ønskede analyse. Disse beskrives i de følgende afsnit.

<sup>6</sup> [http://ec.europa.eu/consumers/consumers\\_safety/safety\\_products/rapex/index\\_en.htm](http://ec.europa.eu/consumers/consumers_safety/safety_products/rapex/index_en.htm)

<sup>7</sup> <http://epp.eurostat.ec.europa.eu/newxtweb/>

### 3.1.1 Forbehold vedrørende brug af data fra RAPEX

*Usikkerhed vedrørende metode til indsamling af produkter.*

I RAPEX findes der ingen viden om hvordan de notificerede produkter er identificeret. Produkterne vil ofte være identificeret på baggrund af en borgerhenvendelse, eller i myndighedernes kontrolkampagner af specifikke produktgrupper. Det er derfor uvist om produkterne i RAPEX er identificeret blandt en mængde produkter, som vil være repræsentativ for markedet. Der er således ingen viden om, hvordan produkterne er udtaget til de kontrolprojekter, hvor i et notificeret produkt blev identificeret, og dermed heller ingen viden om der i indsamlingen af produkterne er taget hensyn til andelen af EU og ikke-EU producerede produkter, eller om andelen af EU og non-EU producerede produkter kan sammenlignes med de produkter, der findes på det europæiske marked. I nogle tilfælde er der evidens for det modsatte, som fx den danske Kemiinspektions målrettede kontrol af container-varer importeret fra 3.i-lande (lande udenfor EU).

Tilgang i denne analyse:

I nedenstående analyser er vi nød til at antage, at de indsamlede produkter er repræsentative for de produkter, der findes på markedet. Velvidende at dette potentielt kan være en stor bias.

*EU landene notificerer forskelligt i RAPEX systemet.*

Der er stor forskel på, hvornår de europæiske lande indberetter et produkt i RAPEX. Danmark kræver fx at produktet udgør en dokumenteret risiko, mens det i andre lande er det nok at produktet indeholder ulovlige kemikalier. Der er ydermere forskel på EU landenes fokus på kemikalier og ressourcer til produktkontrol.

Tilgang i denne analyse:

Der tages ingen specifikke forbehold i analysen, alle notificerede produkter analyseres på samme måde.

### 3.1.2 Forbehold vedrørende brug af Eurostat COMEXTs importstatistik

*Mangelende information om produktionen i EU.*

For at få et overblik over, hvilken andel af en produktgruppe på det europæiske marked, der er produceret i EU, og hvilken andel, der er produceret i andre lande, er det nødvendigt at opstille forsyningsbalancen for den enkelte produktgruppe (forsyningsbalancen = import + produktion – eksport).

Eurostats COMEXT database indeholder gode statistikker for import og eksport af varer i Europa, men indeholder desværre ikke mange oplysninger om produktionen i de enkelte EU lande. Det er derfor ikke muligt på baggrund af disse data at beskrive forsyningsbalancen for enkelte produkttyper i EU, og dermed præcist definere hvilken andel af det europæiske marked landene i og udenfor EU har.

Den manglende information i produktionsstatistikken kan skyldes flere ting, så som at der ikke er en produktion i EU, at produktionen er angivet på forkert varekode (misklassifikation) eller at oplysninger om varekoden er hemmeligholdt af konkurrencemæssige hensyn<sup>8</sup>.

Tilgang i denne analyse:

Vi vælger at fokusere på et enkelt EU-land og antager at produktionen i dette land er nul. Denne tilgang vil give et mindre og dermed mere usikker datasæt, men der vil være gode data for importen af varer fra alle andre EU lande til det udvalgte land. Det vil dermed være muligt at

---

<sup>8</sup>Personlig samtale med Søren Rich Danmarks statistik

sammenligne importen fra lande i og udenfor EU til dette land. Danmark har indberettet alt for få produkter i RAPEX, til at det er muligt at fokusere på de danske indberetninger i denne analyse. Tyskland har derimod indberettet mange produkter i alle produktkategorier og vælges derfor som modelland i denne analyse.

#### *"Rotterdam-effekten"*

Der er en usikkerhed på import-statistikken i Eurostats COMEXT database, da denne baseres på "afsendelsesland", hvilket ikke i alle tilfælde også er "oprindelsesland". Det kan i den forbindelse blive et problem at mange varer fra ikke-EU lande ind-fortoldes og bringes i fri omsætning i de store europæiske havne, for derefter at bringes videre til den egentlige destination. I importstatistikken for andre europæiske lande kommer varerne dermed til at fremgå som import fra eks. Nederlandene, og ikke fra det ikke-EU land som varerne er sendt fra. Fænomenet er generelt for alle store havnebyer i Europa, men kaldes "Rotterdam-effekten", da særligt mange varer shippes til EU her.

#### Tilgang i denne analyse:

Vi antager at alle produkter er produceret i det land hvorfra de er importeret ind i EU. I sammenfatningen vil vi dog også diskutere resultaterne ud fra den hypotese at al import fra fx Nederlandene i virkeligheden er produceret i et ikke-EU land.

### **3.1.3 Andre forbehold**

#### *Definition af oprindelsesland.*

Det kan være problematisk overhovedet at definere det præcise oprindelsesland for sammensatte produkter, som fx mange typer af legetøj. Ofte produceres de forskellige dele i forskellige lande, og samles og pakkes i endnu andre lande.

#### Tilgang i analysen:

Vi antager at hele produktet er produceret i afsendelseslandet registeret i COMEXT.

## **3.2 Analyse af notificerede produkter i RAPEX**

I RAPEX inddeles de notificerede produkter i 29 forskellige produktkategorier. I dette projekt udvælges de tre kategorier "Legetøj", "Kosmetik" og "Tøj, Tekstil og modeprodukter" til analysen. De indeholder relativt mange notifikationer og vil derfor give det største datamateriale. For hver af de tre kategorier er der fra RAPEXs hjemmeside<sup>9</sup> udtrukket to datasæt: Et sæt med udgangspunkt i EU's samlede RAPEX notifikationer i 2013-2014 og et med udgangspunkt i Tysklands RAPEX notifikationer i 2005-2014. Begge datasæt er udtrukket med følgende indstillinger: "Risk type = Chemical", "Risk level = Serious" og "Product use = Consumer". Disse datasæt skal bruges til at beskrive i hvilke lande de notificerede produkter er produceret, og dermed hvilken andel af produkterne, der er produceret i lande henholdsvis i og udenfor EU.

Som beskrevet tidligere er Tyskland er valgt som modelland, da en stor del af de RAPEX-notificerede produkter er indberettet af Tyskland. Fra Eurostat COMEXT der derfor er indhentet information om importen af produkter i de tre produktkategorier til Tyskland i 2005-2014. Navnene på de enkelte varekoder/kategorier under hver af de tre produktkategorier er listet i appendix 1. Disse data skal bruges til at sammenligne importen af disse produkter til Tyskland fra lande i og udenfor EU med andelen af EU og ikke-EU producerede produkter indberettet af Tyskland til RAPEX.

Resultaterne af analyserne for hver produktkategori beskrives i de følgende afsnit, og indeholder følgende figurer:

---

<sup>9</sup> [http://ec.europa.eu/consumers/consumers\\_safety/safety\\_products/rapex/alerts/main/index.cfm?event=main.search](http://ec.europa.eu/consumers/consumers_safety/safety_products/rapex/alerts/main/index.cfm?event=main.search)

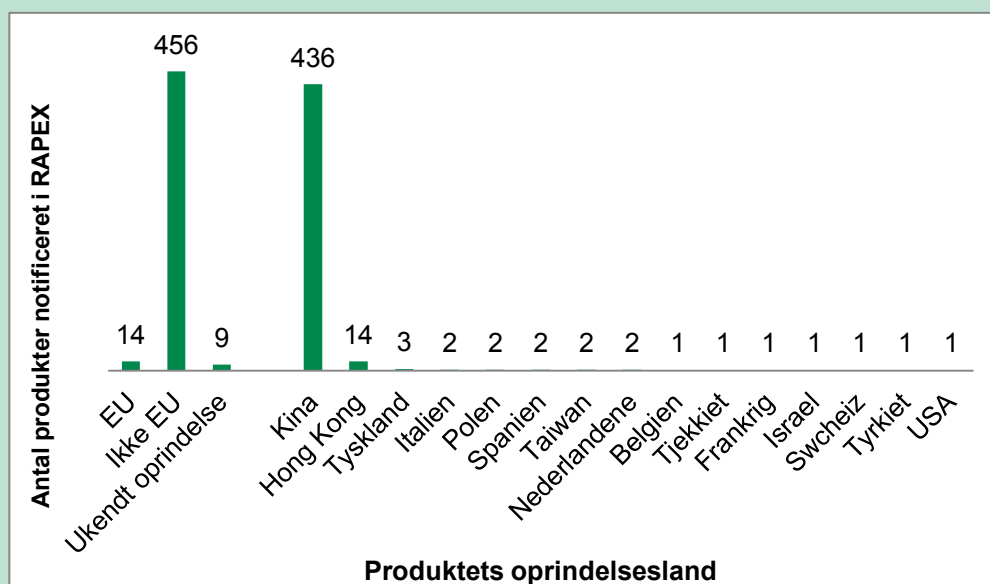

1. Oversigt over antal notifikationer indberettet af alle EU-lande i 2013-2014 fordelt på oprindelseslandene for de indberettede produkter.
2. Oversigt over antal notifikationer indberettet af Tyskland i 2005-2014 fordelt på oprindelseslandene for de indberettede produkter.
3. Sammenligning af EU- og ikke-EU-landes andel af de notificerede produkter indberettet af Tyskland i 2005-2014 under hensyntagen til deres respektive andel af importen af denne produktgruppe til Tyskland i samme periode.

### 3.2.1 Legetøj

#### RAPEX notifikationer for legetøj i EU 2013-2014

I 2013-2014 er der foretaget 479 RAPEX notifikationer i produktkategorien "Legetøj". Af de notificerede produkter er 456 (95 %) produceret i lande udenfor EU (heraf 436 (91 %) i Kina), 14 (3 %) er produceret i EU og for 9 (2 %) produkter er produktionslandet ikke oplyst (figur 1).

**FIGUR 1.** Oprindelsesland for legetøj notificeret i RAPEX i 2013-2014

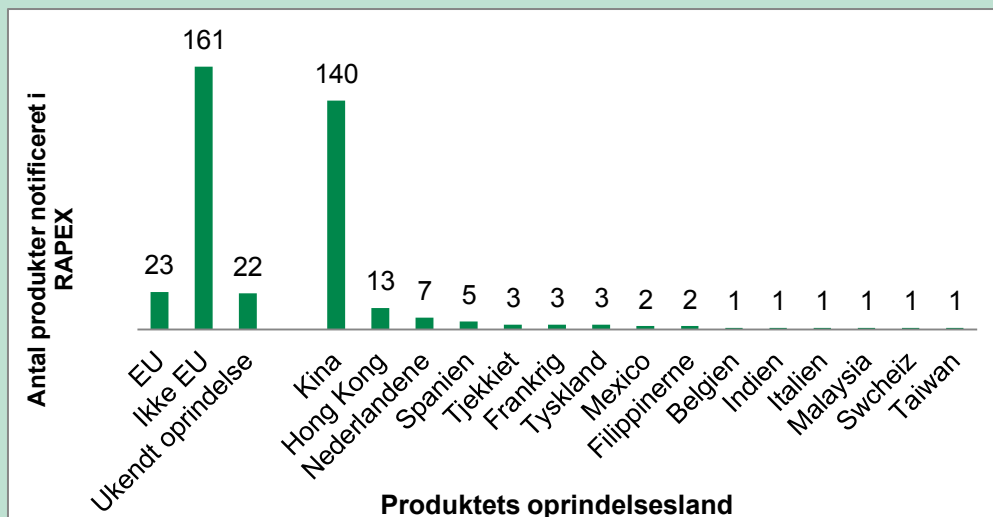

Antal RAPEX-notificerede produkter i kategorien legetøj fordelt på produktionsland i 2013-2014 (n = 479).

#### RAPEX notifikationer og import af legetøj i Tyskland 2005-2014

I 2005-2014 har Tyskland indberettet 206 RAPEX notifikationer i produktkategorien "Legetøj". Af de notificerede produkter er 162 (79 %) produceret i lande udenfor EU (heraf 140 (68 %) i Kina), 22 (10 %) er produceret i EU lande, mens der for 23 (11 %) produkter ikke er indberettet et produktionsland (figur 2).

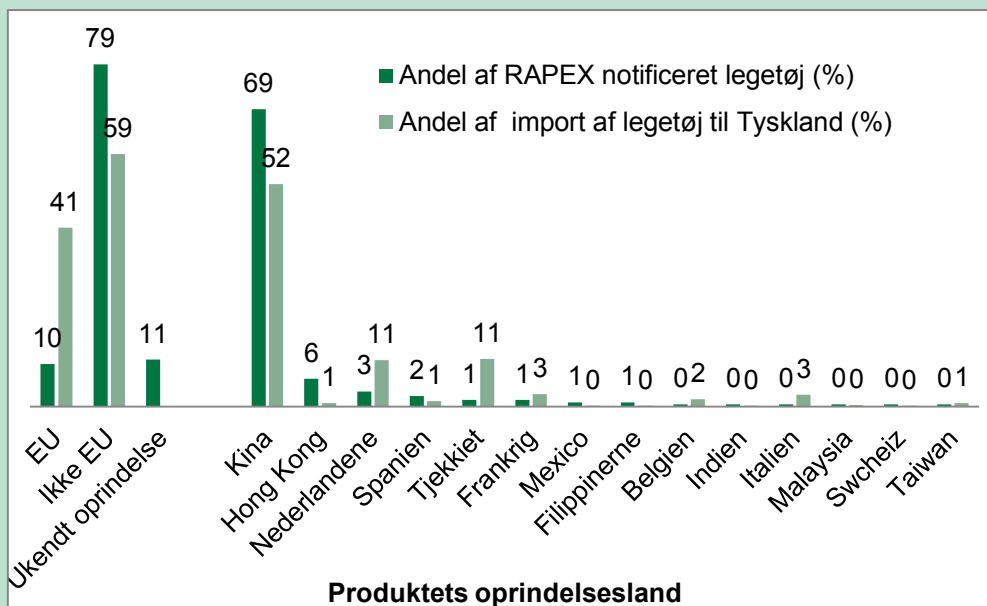

**FIGUR 2.** Oprindelsesland for legetøj notificeret af Tyskland i RAPEX i 2005-2014

Antal produkter notificeret af Tyskland i kategorien legetøj i 2005-2014 fordelt på produktionsland (n = 206).

En sammenligning af de enkelte landes antal af RAPEX-notificerede produkter med deres andel af importen af legetøj ind i Tyskland viser at ikke-EU producerede produkter er overrepræsenteret med 20 % i RAPEX databasen i forhold til ikke-EU landenes andel af importen til Tyskland (figur 3).

**FIGUR 3.** Sammenligning af tyske RAPEX notifikationer for legetøj med importen af legetøj ind i Tyskland i perioden 2005-2014

Andelen af notificerede produkter fordelt på produktionsland og andelen af importen af legetøj i Tyskland fordelt på eksportland. Notificerede produkter produceret i Tyskland er udeladt, da den tyske produktion af legetøj er ukendt. De viste lande producerer 84 % af den totale mængde legetøj, der importeredes ind i Tyskland i 2005-2014 (n = 203).

### Sammenfatning: Legetøj

Størstedelen af det notificerede legetøj i RAPEX er produceret udenfor EU, primært i Kina. Dette gælder både for produkter notificeret af EU i 2013-2014, hvor 95 % er produceret udenfor EU og for produkter notificeret af Tyskland i 2005-2014, hvor 79 % er produceret udenfor EU.

Sammenligningen med importstatistikken for legetøj, viser at ikke-europæiske produkter notificeret af Tyskland i 2005-2014 (79 %) er overrepræsenteret i RAPEX i forhold til de ikke-europæiske landes andel (59 %) af den samlede import af legetøj til Tyskland i 2005-2014.

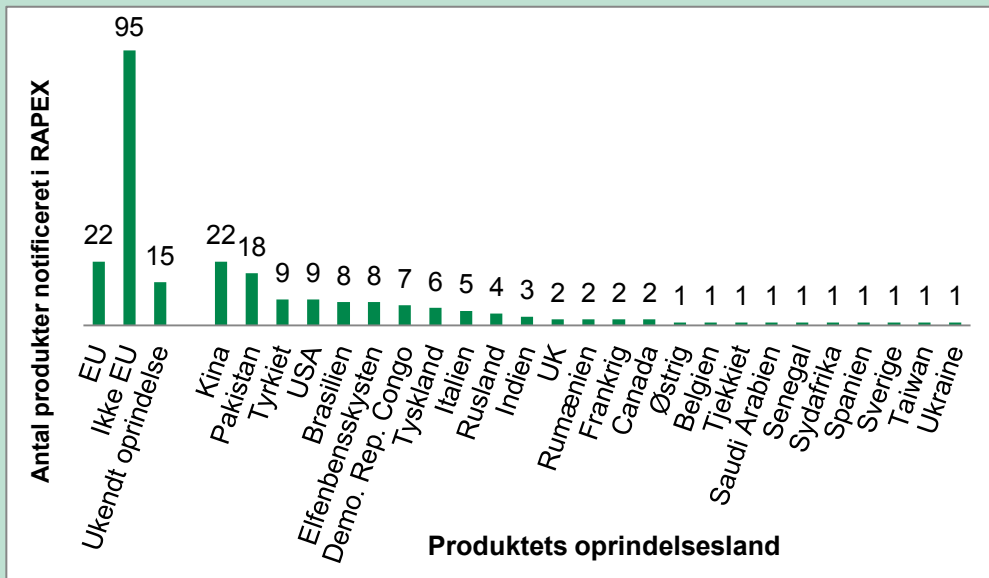

Der er dog som nævnt tidligere en del usikkerheder ved disse tal. Det ses fx at en forholdsvis stor del af importen til Tyskland kommer fra Nederlandene sammenlignet med importen fra andre EU lande. Hvis det antages, at disse produkter i virkeligheden er produceret udenfor EU (jvf. Rotterdam-effekten), vil landene udenfor EU være mindre overrepræsenteret i RAPEX, da importen fra disse lande da vil udgøre 70 % af den samlede import af legetøj til Tyskland. Vores antagelse om at produktionen i Tyskland er nul, vil dog gøre at given produktion i Tyskland vil påvirke vores estimat i den modsatte retning, og medvirke til at landene udenfor EU er mere overrepræsenteret end vist her. Derudover er der den generelle usikkerhed om, hvorvidt indsamlingen af produkterne forud for notifikationerne er repræsentativ for markedet, samt mangel på information om oprindelsesland for 11 % af de RAPEX notificerede produkter.

### 3.2.2 Kosmetik

#### RAPEX notifikationer og import af kosmetik i EU

I 2013-2014 er der foretaget 132 RAPEX-notifikationer i kategorien "Kosmetik". Af de notificerede produkter er 95 (72 %) produceret udenfor EU, (heraf er 44 (33 %) produceret i Asien, 19 (14 %) produceret i Syd- og Nordamerika, 18 (14 %) produceret i Afrika, og 14 (11 %) produceret i øvrige lande udenfor EU). 22 (17 %) produkter er produceret i EU, og for 15 (11 %) produkter var produktionslandet ikke indberettet (figur 4).

FIGUR 4. Oprindelsesland for kosmetiske produkter notificeret i RAPEX i 2013-2014

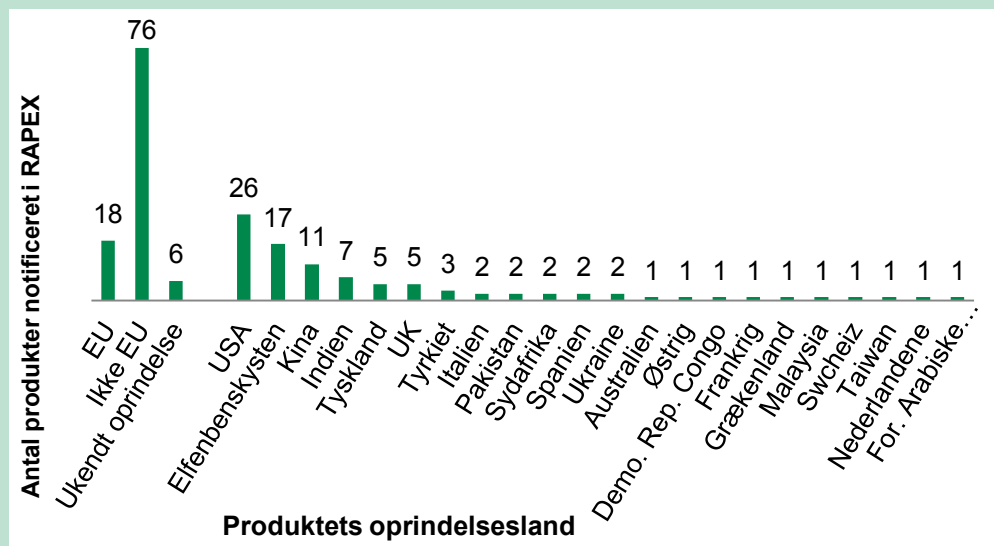

Antal RAPEX-notificerede produkter i kategorien kosmetik fordelt på produktionsland i 2013-2014 (n = 132).

### RAPEX notifikationer og import af kosmetik i Tyskland

I 2005-2014 har Tyskland indberettet 100 RAPEX notifikationer i kategorien "Kosmetik". Af de notificerede produkter er 76 (76 %) produceret i lande udenfor EU, 18 (18 %) produceret i EU, mens der for 6 (6 %) produkter ikke er indberettet et produktionsland (figur 5)

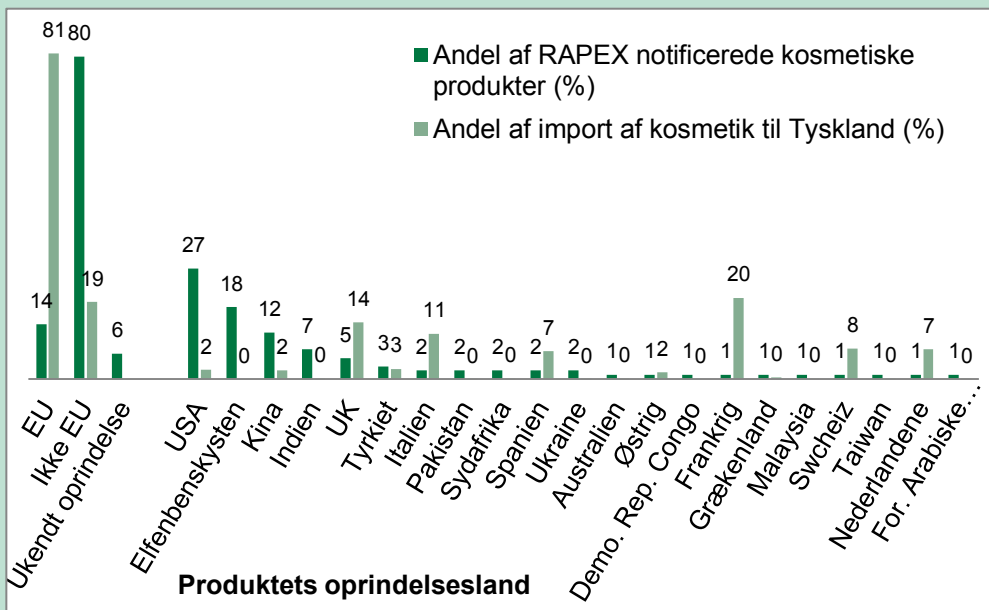

**FIGUR 5.** Oprindelsesland for kosmetik notificeret af Tyskland i perioden 2005-2014

Antal produkter notificeret af Tyskland i kategorien kosmetik i 2005-2014 fordelt på produktionsland (n = 100).

Ved sammenligning af antallet af RAPEX notificerede produkter med produktionslandets andel af importen af kosmetik i Tyskland, kan det ses at ikke europæiske produkter er overrepræsenteret i RAPEX-registeret i forhold til produkter produceret i EU (figur 6).

**FIGUR 6.** Sammenligning af tyske RAPEX notifikationer for kosmetik med importen af kosmetik ind i Tyskland i perioden 2005-2014

Andelen af notificerede produkter fordelt på produktionsland, og andelen af importen af legetøj i Tyskland fordelt på produktionsland. Notificerede produkter produceret i Tyskland er udeladt. De viste lande producerer 84 % af den totale mængde kosmetik, der importeres ind i Tyskland i 2005-2014 (n = 95).

Den procentvise andel af de notificerede produkter som er produceret henholdsvis i og udenfor EU varierer lidt mellem figur 5 og 6. Dette skyldes at de tyskproducerede produkter er udeladt i analysen bag figur 6, da der ikke er tilgængelig information om produktionen af kosmetik i Tyskland, og der dermed kun er kigget på import i denne analyse.

#### Sammenfatning: Kosmetik

Størstedelen af det notificerede kosmetik i RAPEX er produceret udenfor EU, primært i lande som USA, Kina, Pakistan, Tyrkiet, Brasilien og en del afrikanske lande. Dette gælder både for produkter notificeret af EU i 2013-2014, og for produkter notificeret af Tyskland i 2005-2014, hvor henholdsvis 72 % og 76 % er produceret udenfor EU.

Sammenligningen med importstatistikken for kosmetik viser, at ikke-europæiske produkter notificeret af Tyskland i 2005-2014 (80 %) er tydeligt overrepræsenteret i RAPEX i forhold til de ikke-europæiske landes andel (19 %) af den samlede import af kosmetik til Tyskland i 2005-2014.

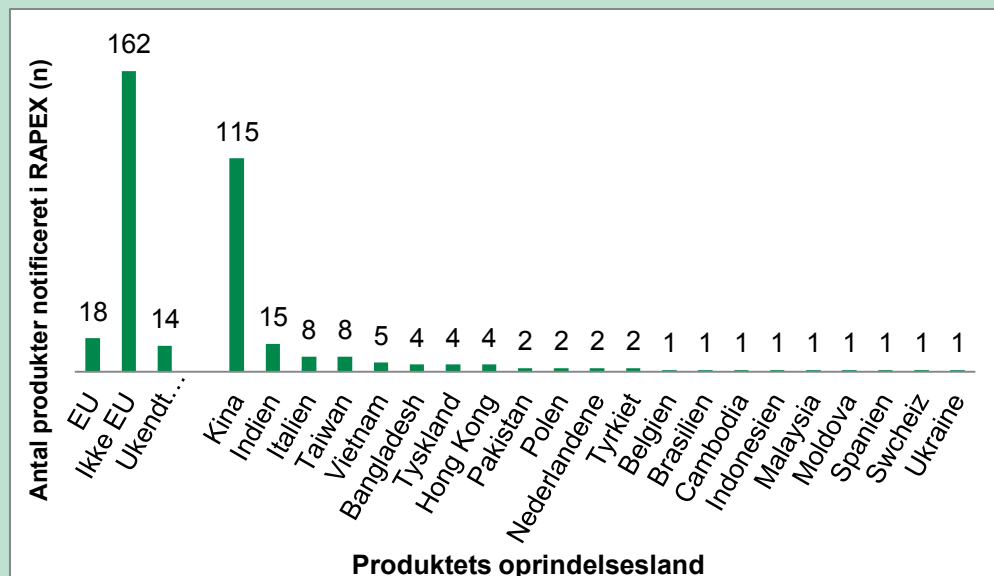

Der ses i begge analyser et stort antal RAPEX-notificerede produkter fra lande som Elfenbenskysten, Den Dem. Rep. Congo, Pakistan, Brasilien, der eksporterer relativt få produkter til EU og Tyskland. Hvilket tyder på, at der er en niche import fra disse lande af produkter som fx blegecreme, der ikke lever op til kemikalielovgivningen i EU.

### 3.2.3 Tekstil, Tøj og Modeprodukter

#### RAPEX notifikationer af tekstil, tøj og modeprodukter i EU

I 2013-2014 er der foretaget 194 RAPEX notifikationer i kategorien "Tøj, Tekstil og Modeprodukter". Af de notificerede produkter er 162 (84 %) produceret udenfor EU (156 (80 %) i Asien), mens 18 (9 %) er produceret i EU. For 14 (7 %) produkter var produktionslandet ikke indberettet (figur 7).

**FIGUR 7.** Oprindelsesland for tøj, tekstil og modeprodukter notificeret i RAPEX i 2013-2014

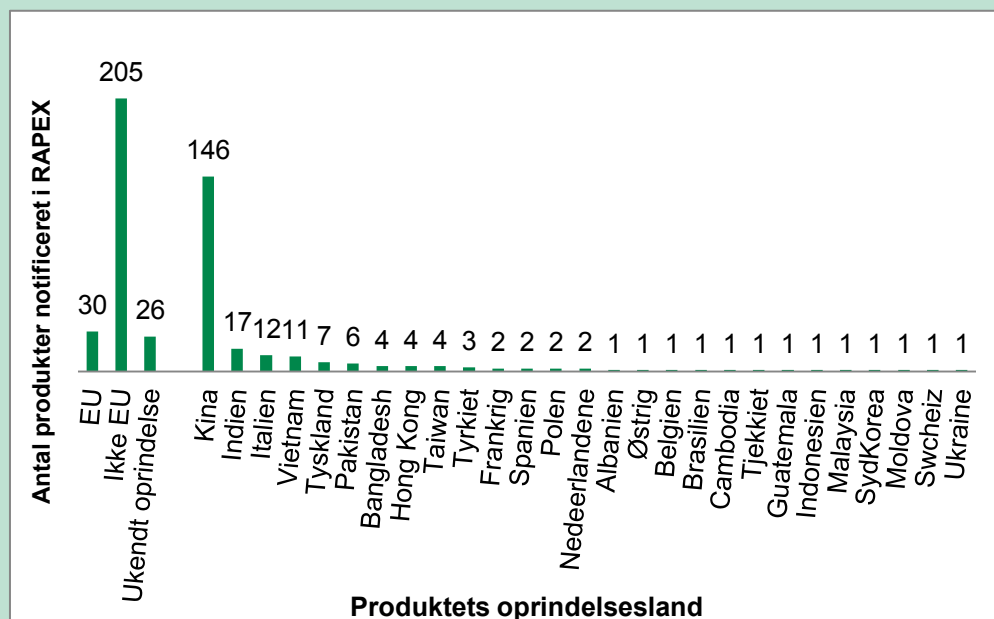

Antal notificerede produkter i kategorien Tøj, Tekstil og Modeprodukter i 2013-2014 fordelt på produktionsland (n = 194).

*RAPEX notifikationer og import af tøj, tekstil og modeprodukter i Tyskland*

I 2005-2014 har Tyskland indberettet 261 RAPEX notifikationer i kategorien "Tøj, Tekstil og Modeprodukter". Af de notificerede produkter er 205 (79 %) produceret i lande udenfor EU, hvoraf 146 (56 %) er produceret i Kina og 30 (11 %) produceret i EU. For 26 (10 %) produkter ikke er indberettet et produktionsland (figur 8).

**FIGUR 8.** Oprindelsesland for tøj, tekstil og modeprodukter notificeret af Tyskland i RAPEX i 2013-2014

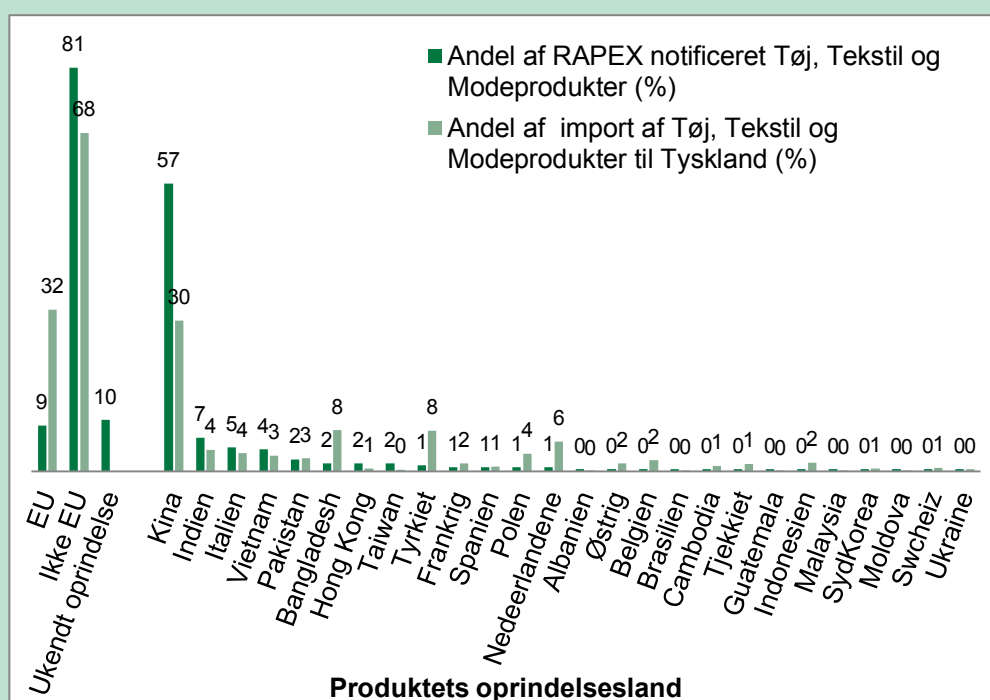

Antal produkter notificeret af Tyskland i kategorien "Tøj, Tekstil og Modeprodukter" i 2005-2014 fordelt på produktionsland (n = 261).

Ved sammenligning af antallet af RAPEX notificerede produkter med produktionslandets andel af importen af tøj, tekstil og modeprodukter i Tyskland, kan vi se at ikke-europæiske (specielt kinesiske) produkter er overrepræsenteret i RAPEX i forhold til produkter produceret i EU (figur 9).

Den procentvise andel af de notificerede produkter som er produceret henholdsvis i og udenfor EU varierer lidt mellem figur 8 og 9. Dette skyldes at de tyskproducerede produkter er udeladt i analysen bag figur 9, da der ikke er tilgængelig information om produktionen af tøj og tekstil i Tyskland, og der dermed kun er kigget på import i denne analyse.

**FIGUR 9.** Sammenligning af tyske RAPEX notifikationer for tøj, tekstil og modeprodukter med importen af legetøj ind i Tyskland i perioden 2005-2014

Andelen af notificerede produkter fordelt på produktionsland, og andelen af importen af tøj og tekstil i Tyskland fordelt på produktionsland. Notificerede produkter produceret i Tyskland er udeladt. (n = 254).

**Sammenfatning: Tekstil, tøj og modeprodukter**

Størstedelen af det notificerede tøj, tekstil og modeprodukter i RAPEX er produceret udenfor EU, primært i Kina. Dette gælder både for produkter notificeret af EU i 2013-2014, og for produkter notificeret af Tyskland i 2005-2014, hvor henholdsvis 84 % og 79 % er produceret udenfor EU.

Sammenligningen med importstatistikken for tekstil og tøj viser, at de ikke-europæiske produkter notificeret af Tyskland i 2005-2014 (81 %) er overrepræsenteret i RAPEX i forhold til de ikke-europæiske landes andel af den samlede import af tekstil og tøj til Tyskland i 2005-2014 (68 %).

På landeniveau kan det ses, at produkter fra Kina er mere overrepræsenteret i RAPEX i forhold til de øvrige lande udenfor EU, det til trods for at Kina også har langt den største eksport til Tyskland.

Der gælder de samme usikkerheder for kategorien tøj, tekstil og modeprodukter, som tidligere beskrevet for legetøj. Det ses også her at en forholdsvis stor del af importen til Tyskland kommer fra Nederlandene sammenlignet med importen fra andre EU lande. Hvis det antages, at disse produkter i virkeligheden er produceret udenfor EU (jvf. Rotterdam-effekten), vil landene udenfor EU være mindre overrepræsenteret i RAPEX, da importen fra disse lande da vil udgøre 74 % af den samlede import af tekstil og tøj til Tyskland. Ligeledes vil en given produktion af tøj, tekstil og modeprodukter i Tyskland ændre estimatet i den modsatte retning, og medvirke til at landene udenfor EU er mere overrepræsenteret end vist her. Derudover er der den generelle usikkerhed om, hvorvidt indsamlingen af produkterne forud for notifikationerne er repræsentativ for markedet, samt mangel på information om oprindelsesland for 10 % af de RAPEX notificerede produkter.

### **3.3 Konklusion: Analyse af data fra RAPEX og Eurostat COMEXT**

De mange forbehold forbundet med brugen af data fra RAPEX og Eurostat COMEXT databasen gør det svært at konkludere præcist, hvorvidt der er forskel mellem produkter produceret i EU og udenfor EU i forhold til indholdet af problematisk kemi. Men analysen i denne rapport kan bruges til at beskrive trends.

En gennemgående trend for alle tre produktkategorier er, at størstedelen af de RAPEX-notificerede produkter er produceret udenfor EU og at landene udenfor EU er overrepræsenteret i RAPEX, også under hensyntagen til deres andel af importen af produkter i de undersøgte produktkategorier til EU-markedet.

For kategorierne 'Legetøj' og 'Tøj, Tekstil, og Modeprodukter' kommer størstedelen af de importerede produkter fra Asien. Her ses en tendens til at de store eksportlande (specielt Kina) har flere notificerede produkter i RAPEX end hvad der er forventeligt på baggrund af deres andel af de importerede produkter.

Anderledes ser det ud for produktkategorien 'Kosmetik', hvor størstedelen af produkterne produceres i EU lande. Her ses en tydelig overrepræsentation af ikke-EU producerede produkter i RAPEX, men de notificerede produkter importeres primært fra lande med en relativ lille eksport til EU, fx Elfenbenskysten, Den Demo. Rep. Congo, Pakistan og Brasilien. Denne tendens kan formentlig forklares ved, at der for de notificerede produkter er tale om nicheprodukter, fx blegecreme, som importeres enten af private eller af små importører, der ikke lever op til kemikalielovgivningen i EU. I den forbindelse kan det diskuteres om registreringsgrænsen på 1 ton pr år pr producent eller importør er sufficient til beskyttelse af forbrugerne, da forbrugerprodukter også kommer til EU via små importører.

Som nævnt i første del af rapporten er der en bedre beskyttelse af produkter (artikler), som består af stoffer/blandinger, der i sig selv er produceret i EU, jf. ovenfor om godkendelsesordningen og registreringsforpligtelsen. Analysen i rapporten anden del viser ligeledes at lande udenfor EU er overrepræsenteret i RAPEX. Dette er uafhængigt af om produktionen af produkterne primært ligger udenfor EU (Legetøj og Tøj, Tekstil og Modeprodukter) eller indenfor EU (Kosmetik). Dette resultat skal dog vurderes i forhold til den generelle usikkerhed om, hvordan de notificerede produkter er identificeret, da antallet og typen af notificerede produkter vil afhænge af, hvilke indberetninger der modtages og hvilke kontrolindsatser der foretages i de forskellige medlemslande.

Da produkter fra ikke-europæiske lande i høj grad indskibes i EU via de store havne kan "Rotterdam-effekten" give usikkerheder i validiteten af importstatistikken. Hvis en stor del af de varer, der registreres som værende importeret fra fx Nederlandene i virkeligheden er produceret udenfor EU, vil den observerede trend svækkes, og landene udenfor EU vil være mindre overrepræsenteret i RAPEX, da importen fra disse lande da vil udgøre en større andel end

estimatet i denne rapports analyse viser. Omvendt ville kendskabet til en given produktion i Tyskland/EU forstærke den observerede trend, der viser at ikke-EU lande er overrepræsenteret i RAPEX i forhold til deres andel af EU markedet for de enkelte produktkategorier.

WAX-COVERED WICKS OF THE TAPER VARIETY, FUSES AND DETONATING FUSES, WICKS IN THE FORM OF TEXTILE YARN AND GLASS-FIBRE WICKS)

HOSEPIPING AND SIMILAR TUBING OF SYNTHETIC FIBRES, WHETHER OR NOT IMPREGNATED OR COATED, WITH OR WITHOUT LINING, ARMOUR OR ACCESSORIES OF OTHER MATERIALS

TEXTILE HOSEPIPING AND SIMILAR TEXTILE TUBING, WHETHER OR NOT IMPREGNATED OR COATED, WITH OR WITHOUT LINING, ARMOUR OR ACCESSORIES OF OTHER MATERIALS (EXCL. TUBING OF SYNTHETIC FIBRES)

TRANSMISSION OR CONVEYOR BELTS OR BELTING, OF TEXTILE MATERIAL, WHETHER OR NOT IMPREGNATED, COATED, COVERED OR LAMINATED WITH PLASTICS, OR REINFORCED WITH METAL OR OTHER MATERIAL (EXCL. THOSE OF A THICKNESS OF < 3 MM AND OF INDETERMINATE LENGTH OR CUT TO LENGTH ONLY, AND THOSE IMPREGNATED, COATED, COVERED OR LAMINATED WITH RUBBER OR MADE OF YARN OR CORD IMPREGNATED OR COATED WITH RUBBER)

TEXTILE FABRICS, FELT AND FELT-LINED WOVEN FABRICS, COATED, COVERED OR LAMINATED WITH RUBBER, LEATHER OR OTHER MATERIAL, OF A KIND USED FOR CARD CLOTHING, AND SIMILAR FABRICS OF A KIND USED FOR OTHER TECHNICAL PURPOSES, INCL. NARROW FABRICS MADE OF VELVET IMPREGNATED WITH RUBBER, FOR COVERING WEAVING SPINDLES "WEAVING BEAMS"

BOLTING CLOTH, WHETHER OR NOT MADE UP

WOVEN TEXTILE FABRICS, WHETHER OR NOT FELTED, OF SILK OR MAN-MADE FIBRES, ENDLESS OR FITTED WITH LINKING DEVICES, OF A KIND USED IN PAPERMAKING MACHINES, WEIGHING < 650 G/M<sup>2</sup> (FOR EXAMPLE, FORMING FABRICS)

WOVEN TEXTILE FABRICS AND FELTS, OF SILK OR ARTIFICIAL FIBRES, ENDLESS OR FITTED WITH LINKING DEVICES, OF A KIND USED IN PAPERMAKING MACHINES, INCL. WOVEN FABRICS AND FELTS OF SILK OR MAN-MADE FIBRES FOR USE IN SIMILAR MACHINES, E.G. FOR PAPER PULP OR ASBESTOS-CEMENT, WEIGHING < 650 G/M <sup>2</sup>
TEXTILE FABRICS AND FELTS, ENDLESS OR FITTED WITH LINKING DEVICES, OF A KIND USED IN PAPERMAKING OR SIMILAR MACHINES, E.G. FOR PAPER PULP OR ASBESTOS-CEMENT, WEIGHING < 650 G/M <sup>2</sup> (EXCL. THOSE OF SILK OR MAN-MADE FIBRES)
WOVEN TEXTILE FABRICS HAVING A BATT LAYER NEEDED ON THEM, OF SILK OR MAN-MADE FIBRES, ENDLESS OR FITTED WITH LINKING DEVICES, OF A KIND USED IN PAPERMAKING MACHINES, WEIGHING >= 650 G/M <sup>2</sup> , (FOR EXAMPLE, PRESS FELTS)
TEXTILE FABRICS AND FELTS, OF SILK OR MAN-MADE FIBRES, ENDLESS OR FITTED WITH LINKING DEVICES, OF A KIND USED IN PAPERMAKING OR SIMILAR MACHINES, E.G. FOR PAPER PULP OR ASBESTOS-CEMENT, WEIGHING >= 650 G/M <sup>2</sup> (EXCL. WOVEN FABRICS HAVING A BATT LAYER NEEDED ON THEM, PRESS FELTS)
TEXTILE FABRICS AND FELTS, ENDLESS OR FITTED WITH LINKING DEVICES, OF A KIND USED IN PAPERMAKING OR SIMILAR MACHINES, E.G. FOR PAPER PULP OR ASBESTOS-CEMENT, WEIGHING >= 650 G/M <sup>2</sup> (EXCL. THOSE OF SILK OR MAN-MADE FIBRES)
STRAINING CLOTH OF A KIND USED IN OIL-PRESSES OR FOR SIMILAR TECHNICAL PURPOSES, INCL. THAT OF HUMAN HAIR
FELT PRODUCTS AND ARTICLES, FOR TECHNICAL PURPOSES, SPECIFIED IN NOTE 7 TO CHAPTER 59, N.E.S.
TEXTILE PRODUCTS AND ARTICLES, FOR TECHNICAL PURPOSES, SPECIFIED IN NOTE 7 TO CHAPTER 59, N.E.S. (EXCL. THOSE OF FELT)
CONFIDENTIAL TRADE OF CHAPTER 59 AND SITC GROUP 999
LONG PILE" FABRICS, KNITTED OR CROCHETED
LOOPED PILE FABRICS OF COTTON, KNITTED OR CROCHETED
LOOPED PILE FABRICS OF MAN-MADE FIBRES, KNITTED OR CROCHETED
LOOPED PILE FABRICS, KNITTED OR CROCHETED (EXCL. OF COTTON OR MAN-MADE FIBRES)
PILE FABRICS OF COTTON, KNITTED OR CROCHETED (EXCL. "LONG PILE" FABRICS)
PILE FABRICS OF MAN-MADE FIBRES, KNITTED OR CROCHETED (EXCL. "LONG PILE" FABRICS)
PILE FABRICS, KNITTED OR CROCHETED (EXCL. COTTON OR MAN-MADE FIBRES AND "LONG PILE" FABRICS)
KNITTED OR CROCHETED FABRICS, OF A WIDTH OF <= 30 CM, CONTAINING >= 5% BY WEIGHT ELASTOMERIC YARN (EXCL. CONTAINING RUBBER THREAD, PILE FABRICS, INCL. "LONG PILE", LOOPED PILE FABRICS, LABELS, BADGES AND SIMILAR ARTICLES, AND KNITTED OR CROCHETED FABRICS, IMPREGNATED, COATED, COVERED OR LAMINATED)
KNITTED OR CROCHETED FABRICS, OF A WIDTH OF <= 30 CM, CONTAINING >= 5% BY WEIGHT ELASTOMERIC YARN AND RUBBER THREAD OR RUBBER THREAD ONLY (EXCL. PILE FABRICS, INCL. "LONG PILE", LOOPED PILE FABRICS, LABELS, BADGES AND SIMILAR ARTICLES, KNITTED OR CROCHETED FABRICS, IMPREGNATED, COATED, COVERED OR LAMINATED, AND STERILE SURGICAL OR DENTAL ADHESION BARRIERS OF SUBHEADING 3006.10.30)
KNITTED OR CROCHETED FABRICS OF WOOL OR FINE ANIMAL HAIR, OF A WIDTH OF <= 30 CM (EXCL. THOSE CONTAINING BY WEIGHT >= 5% OF ELASTOMERIC YARN OR RUBBER THREAD, AND PILE FABRICS, INCL. "LONG PILE", LOOPED PILE FABRICS, LABELS, BADGES AND SIMILAR ARTICLES, AND KNITTED OR CROCHETED FABRICS, IMPREGNATED, COATED, COVERED OR LAMINATED)
KNITTED OR CROCHETED FABRICS OF COTTON, OF A WIDTH OF <= 30 CM (EXCL. THOSE CONTAINING BY WEIGHT >= 5% OF ELASTOMERIC YARN OR RUBBER THREAD, AND PILE FABRICS, INCL. "LONG PILE", LOOPED PILE FABRICS, LABELS, BADGES AND SIMILAR ARTICLES, AND KNITTED OR CROCHETED FABRICS, IMPREGNATED, COATED, COVERED OR LAMINATED)
RASCHEL LACE OF SYNTHETIC FIBRES, OF A WIDTH OF <= 30 CM (EXCL. THOSE CONTAINING BY WEIGHT >= 5% OF ELASTOMERIC YARN OR RUBBER THREAD)
KNITTED OR CROCHETED FABRICS OF SYNTHETIC FIBRES, OF A WIDTH OF <= 30 CM (EXCL. RASCHEL LACE, THOSE CONTAINING BY WEIGHT >= 5% OF ELASTOMERIC YARN OR RUBBER THREAD, AND PILE FABRICS, INCL. "LONG PILE", LOOPED PILE FABRICS, LABELS, BADGES AND SIMILAR ARTICLES, KNITTED OR CROCHETED FABRICS, IMPREGNATED, COATED, COVERED OR LAMINATED, AND STERILE SURGICAL OR DENTAL ADHESION BARRIERS OF SUBHEADING 3006.10.30)
KNITTED OR CROCHETED FABRICS OF ARTIFICIAL FIBRES, OF A WIDTH OF <= 30 CM (EXCL. THOSE CONTAINING BY WEIGHT >= 5% OF ELASTOMERIC YARN OR RUBBER THREAD, AND PILE FABRICS, INCL. "LONG PILE", LOOPED PILE FABRICS, LABELS, BADGES AND SIMILAR ARTICLES, KNITTED OR CROCHETED FABRICS, IMPREGNATED, COATED, COVERED OR LAMINATED, AND STERILE SURGICAL OR DENTAL ADHESION BARRIERS OF SUBHEADING 3006.10.30)
KNITTED OR CROCHETED FABRICS OF A WIDTH OF <= 30 CM (EXCL. OF COTTON, MAN-MADE FIBRES, WOOL OR FINE ANIMAL HAIR, THOSE CONTAINING BY WEIGHT >= 5% OF ELASTOMERIC YARN OR RUBBER THREAD, AND PILE FABRICS, INCL. "LONG PILE", LOOPED PILE FABRICS, LABELS, BADGES AND SIMILAR ARTICLES, KNITTED OR CROCHETED FABRICS, IMPREGNATED, COATED, COVERED OR LAMINATED, AND STERILE SURGICAL OR DENTAL ADHESION BARRIERS OF SUBHEADING 3006.10.30))
KNITTED OR CROCHETED FABRICS, OF A WIDTH OF > 30 CM, CONTAINING >= 5% BY WEIGHT ELASTOMERIC YARN (EXCL. CONTAINING RUBBER THREAD, PILE FABRICS, INCL. "LONG PILE", LOOPED PILE FABRICS, LABELS, BADGES AND SIMILAR ARTICLES, AND KNITTED OR CROCHETED FABRICS, IMPREGNATED, COATED, COVERED OR LAMINATED)
KNITTED OR CROCHETED FABRICS, OF A WIDTH OF > 30 CM, CONTAINING >= 5% BY WEIGHT ELASTOMERIC YARN AND RUBBER THREAD OR RUBBER THREAD ONLY (EXCL. PILE FABRICS, INCL. "LONG PILE", LOOPED PILE FABRICS, LABELS, BADGES AND SIMILAR ARTICLES, AND KNITTED OR CROCHETED FABRICS, IMPREGNATED, COATED, COVERED OR LAMINATED)
UNBLEACHED OR BLEACHED COTTON WARP KNOT FABRICS "INCL. THOSE MADE ON GALLOON KNITTING MACHINES", OF A WIDTH OF > 30 CM (EXCL. THOSE CONTAINING BY WEIGHT >= 5% OF ELASTOMERIC YARN OR RUBBER THREAD, AND PILE FABRICS, INCL. "LONG PILE", LOOPED PILE FABRICS, LABELS, BADGES AND SIMILAR ARTICLES, AND KNITTED OR CROCHETED FABRICS, IMPREGNATED, COATED, COVERED OR LAMINATED)
DYED COTTON WARP KNOT FABRICS "INCL. THOSE MADE ON GALLOON KNITTING MACHINES", OF A WIDTH OF > 30 CM (EXCL. THOSE CONTAINING BY WEIGHT >= 5% OF ELASTOMERIC YARN OR RUBBER THREAD, AND PILE FABRICS, INCL. "LONG PILE", LOOPED PILE FABRICS, LABELS, BADGES AND SIMILAR ARTICLES, AND KNITTED OR CROCHETED FABRICS, IMPREGNATED, COATED, COVERED OR LAMINATED)
COTTON WARP KNOT FABRICS OF YARNS OF DIFFERENT COLOURS "INCL. THOSE MADE ON GALLOON KNITTING MACHINES", OF A WIDTH OF > 30 CM (EXCL. THOSE CONTAINING BY WEIGHT >= 5% OF ELASTOMERIC YARN OR RUBBER THREAD, AND PILE FABRICS, INCL. "LONG PILE", LOOPED PILE FABRICS, LABELS, BADGES AND SIMILAR ARTICLES, AND KNITTED OR CROCHETED FABRICS, IMPREGNATED, COATED, COVERED OR LAMINATED)
PRINTED COTTON WARP KNOT FABRICS "INCL. THOSE MADE ON GALLOON KNITTING MACHINES", OF A WIDTH OF > 30 CM (EXCL. THOSE CONTAINING BY WEIGHT >= 5% OF ELASTOMERIC YARN OR RUBBER THREAD, AND PILE FABRICS, INCL. "LONG PILE", LOOPED PILE FABRICS, LABELS, BADGES AND SIMILAR ARTICLES, AND KNITTED OR CROCHETED FABRICS, IMPREGNATED, COATED, COVERED OR LAMINATED)
UNBLEACHED OR BLEACHED WARP KNOT FABRICS OF SYNTHETIC FIBRES "INCL. THOSE MADE ON GALLOON KNITTING MACHINES", OF A WIDTH OF > 30 CM, FOR CURTAINS, INCL. NET CURTAIN FABRIC (EXCL. THOSE CONTAINING BY WEIGHT >= 5% OF ELASTOMERIC YARN OR RUBBER THREAD, AND PILE FABRICS, INCL. "LONG PILE", LOOPED PILE FABRICS, AND KNITTED OR CROCHETED FABRICS, IMPREGNATED, COATED, COVERED OR LAMINATED)
UNBLEACHED OR BLEACHED RASCHEL LACE, WARP KNOT, OF SYNTHETIC FIBRES "INCL. THOSE MADE ON GALLOON KNITTING MACHINES", OF A WIDTH OF > 30 CM (EXCL. FOR CURTAINS OR NET CURTAIN FABRIC AND THOSE CONTAINING BY WEIGHT >= 5% OF ELASTOMERIC YARN OR RUBBER THREAD)
UNBLEACHED OR BLEACHED WARP KNOT FABRICS OF SYNTHETIC FIBRES "INCL. THOSE MADE ON GALLOON KNITTING MACHINES", OF A WIDTH OF > 30 CM (EXCL. FOR CURTAINS, RASCHEL LACE, THOSE CONTAINING BY WEIGHT >= 5% OF ELASTOMERIC YARN OR RUBBER THREAD, AND PILE FABRICS, INCL. "LONG PILE", LOOPED PILE FABRICS, LABELS, BADGES AND SIMILAR ARTICLES, AND KNITTED OR CROCHETED FABRICS, IMPREGNATED, COATED, COVERED OR LAMINATED)
DYED WARP KNOT FABRICS OF SYNTHETIC FIBRES "INCL. THOSE MADE ON GALLOON KNITTING MACHINES", OF A WIDTH OF > 30 CM, FOR CURTAINS, INCL. NET CURTAIN FABRIC (EXCL. ## **Kemikalier i forbrugerprodukter importeret fra lande udenfor EU**

Der er indikationer på, at en større mængde af de forbrugerprodukter, der indeholder problematiske kemiske stoffer på det danske og EU's marked er produceret i lande uden for EU snarere end inden for EU. Disse produkter kan udgøre en øget risiko for menneskers sundhed og for miljøet. Desværre kender man på nuværende tidspunkt ikke meget til problemets omfang.

Denne rapport præsenterer et første forsøg på at analysere problemet og vil bidrage til den danske Miljøstyrelses fremtidige indsats på området.

I rapportens første del gennemgås dele af den eksisterende lovgivning for forbrugerprodukter i EU. Det beskrives i denne sammenhæng i hvilket omfang, reguleringen er forskellig for produkter afhængigt af, om disse produceres i EU eller importeres fra lande udenfor. Det sker med henblik på at vurdere, om et evt. problem med problematiske kemikalier i importerede produkter måtte skyldes mangler i EU's kemikalie-lovgivning. I rapportens anden del bliver problemstillingen belyst ved en sammenligning af oplysninger om notificerede produkter i RAPEX med information om importen af produkter til EU.
