

Life Cycle Assessment of Slurry Management Technologies

Marianne Wesnæs og Henrik Wenzel

University of Southern Denmark

Bjørn Molt Petersen

Department of Agroecology and Environment,
Faculty of Agricultural Sciences,
Aarhus University

The Danish Environmental Protection Agency will, when opportunity offers, publish reports and contributions relating to environmental research and development projects financed via the Danish EPA.

Please note that publication does not signify that the contents of the reports necessarily reflect the views of the Danish EPA.

The reports are, however, published because the Danish EPA finds that the studies represent a valuable contribution to the debate on environmental policy in Denmark.
